End to End Spa & Bath Solutions

Ushmāya

Ushm: source of energy;

Māya: life & creation

The logo symbolizes warmth, protection & care of a mother's womb. Real time temperature changes and fluid content is significant for begetting a healthy baby, and at Ushmaya this is precisely the philosophy we abide by. We at Ushmaya delicately combine nature's rejuvenating, protective touch with innovative backend technologies to strike perfect wellbeing.

Ushmaya Cares...

Ushmaya Wellness offers end-to-end spa & bath solutions in the lifestyle segment. We believe in true Salus par Aqua (healing through water), the age-old wisdom of staying healthy naturally by effectively using water; from ice to steam in utilizing water in its various forms.

Our integrated technologies have been nurtured and refined over a period of two decades to develop luxury commercial & residential spas, on turnkey basis.

- Technology Integration** – We own manufacturing of our systems which means that the experience you get is a result of various technologies working in tandem. Complete integration to deliver the most powerful results.
- Green Technology** – Ushmaya technologies helps you conserve energy & water significantly!
- Standardization** – All our systems are standardized and their sub-assemblies boast of zero-breakdowns.
- Safety** – In-depth focus on operational safety, which ensures that patrons experience the wonders of technologies that are fully tested and safe.
- Project Cost Control** – In-house knowledge of installation and systems ensure optimized CAPEX and increased financial performance. Since we own the process end-to-end, we are able to keep the costs at a minimum!
- After Sales Support** – All our capabilities are in-house, right from ideation to commissioning...and complete after sales support. Total peace of mind guaranteed!

Ushmaya Spa & Bath Technology

Our technologies are backed by 20 years of comprehensive R&D and innovation efforts in the spa & bath space. Our immense technological leadership has helped us develop a host of new innovations, industry firsts – globally!

We work at the very basic level of understanding water and breaking it down further to precisely understand how water works in so many therapeutic ways. We believe that wellness and water go hand in hand. Using this as the base we work with water and its following parameters:

Water **TEMPRATURE**

Water **PRESSURE**

Water **QUALITY**

Water **QUANTITY**

What you see today is a result of technologies worked, re-worked and fine tuned over the years, based on hands on installation experience.

With our acquired technology we set up miniature residential spa bathrooms, signature pool villas to a fully optimized Hydro Thermal Circuits. We have been able to create a niche for ourselves in the spa & bath space.

At Ushmaya, we promise to transcend your bathing experience and deliver an ultimate sensory experience.

Own your Ushmaya Experience...NOW!

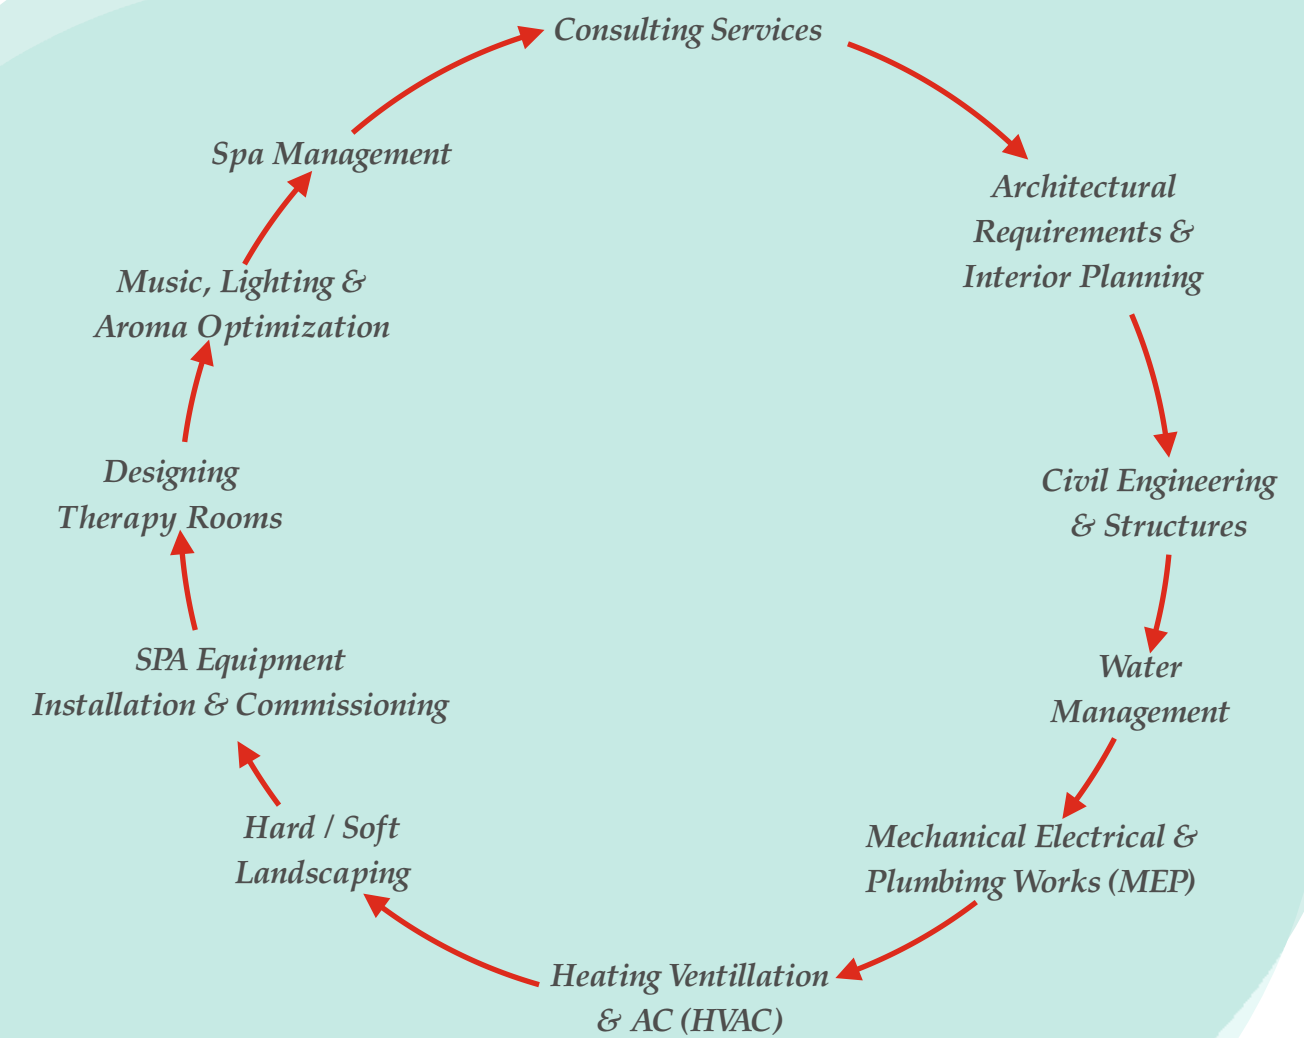

Transcend your normal bathing experience...

Our Comprehensive Approach

A comprehensive 11-step approach ensures that our patrons are on the receiving side of nothing but the very best. At Ushmaya, we follow a "no-stone-left-untuned" approach. We work with you and your team from the scratch and deliver truly powerful, best-in-class Spa built on set parameters on turnkey basis.

Spa Consulting Services

Put an end to reinventing the wheel. Our robust industry experience ensures that you receive the best guidance while setting up your own luxury residential or commercial spa.

Detailed project scoping with the promoters is undertaken which is followed by an Objective Study. We offer a one-stop-shop solution to every aspect of our client's requirement. Technical, marketing and financial teams all work in tandem to list out a feasibility report.

Building Spas on Turnkey Basis

Each foot of space is carefully divided into revenue & non-revenue areas and have a healthy balance between the two. Keeping in mind the commercial expectations we undertake 2D & 3D rendering with our designers. Our team of experts ensures that the luxury and grandeur of the projects is delivered while maintaining its operational efficiency and commercial viability.

We help you build gym, saloon, spa cafe to your exiting facility on turnkey basis.

Spa Management Services

We help you run a facility profitably. We coach your team on marketing elements, financial management, HR policies, spa service menu etc. We have an in-house team of trainers that will provide on the job training to your therapists.

Heat Therapy

Heat therapy, very simply involves exposing part or all of the body to high temperatures. Heat has for long has been considered as a natural treatment for various pains & infections.

The first documented use of heat treatment dates back to 500 BC, when the Greek physician Parmenides came to believe that if he could create fever, he could cure all illness. In India, heat was used to treat breast cancer more than a thousand years before that.

Heat, when leveraged suitably using Ushmaya's patented technologies, helps boost immunity and promote natural wellbeing.

Luxury Residential Spa Bathrooms and Signature Pool Villas

Bathing today, have transformed from being a mere daily activity to being a wellness retreat. Create an extraordinary sensory experience every time you bathe. Ushmaya technology allows us to drive holistic wellbeing by the efficient use of water – nature's gift to mankind. Neutralize lifestyle related disorders caused by stress, toxins and infections and boost natural immunity, all empowered by Ushmaya's cutting-edge spa & bath technology.

Heat Therapy

1) Optimized/Standard Steam Room

Optimized steam rooms that deliver comprehensive benefits of heat therapy, by integration of:

- ☞ Smart steam generators and controls that are best in class
- ☞ Streamlined electrical, plumbing & commissioning
- ☞ Steam pipeline & steam head

- ☞ Optimized water body management systems including: water filtration management, heating/cooling solutions, lighting, air ducts and bubble jet system, ozone ready, hydro massage jets & pumps
- ☞ Control panel and centre assembly
- ☞ Electrical installation & plumbing, supervision & commissioning

2) Thermal Circuits Incorporated with Intelligent Water Management System*

Transform your mundane bathing experience and extract the true healing potential of water to restore natural wellbeing.

Ushmaya Thermal Circuits are first of its kind and empower you to effectively alter your body temperature in real time. Enjoy the ultimate sensory experience that is therapeutic too.

* Browse through various Ushmaya Thermal Circuit options on page 19.

Hydro Therapy

Hydrotherapy is the use of water in the treatment of different conditions, including arthritis and related stiff & sore complaints. The use of water for therapy has been around for hundreds of years, as far back as the ancient Greeks and Romans, and forms an integral part in many traditional medicine systems.

Hydrotherapy makes use of the body's reaction to hot and cold stimuli, to the protracted application of heat, to the pressure exerted by the water, and to the sensation of the water itself. Nerves carry what is felt by the skin deeper into the body, where it is then vital in stimulating the immune system, influencing the production of stress hormones, improving circulation and digestion, encouraging the flow of blood, and lessening the body's sensitivity to pain.

Swimming Pools & Landscaping

Ushmaya offers a wide variety of customizable pools including:

- ▣ Above/underground
- ▣ Skimmer/overflow type
- ▣ Pools that incorporate water features and landscaping to enhance overall lifestyle experience
