

UW WHIRLPOOLS

Dimensions & Specifications

Luxury whirlpool systems to submerge you in total water joy...

WHIRLPOOL SYSTEMS

Warm water coupled with pressure, massages & relaxes muscles, soothes nerves and relieves stress. Social and private, fun and calming, a UW signature spa whirlpool rejuvenates you, and leaves you wanting more.

We give you an end to end solution. We take care of your daily nuances of filling, draining, filtration and heating to give you a well planned and lasting solution.

We have a range of prefab whirlpool spas and if prefab is not your way, we can power your visions through a handmade whirlpool to suit your desires.

Our prefab tubs are made using Italian technology involving resin, moulding, thermoforming & dispensing systems. Further, our luxury bath tubs are reinforced with triple layer of glass reinforced plastic for durability and long life. Our special coating of ultra protective urethane clear (DUPONT) gives the surface unbreakable 2H scratch resistance.

Every whirlpool carrying the UW mark is finely crafted with high quality materials.

MATERIALS

Acrylic, concrete, Corian, Glass side

FUNCTIONALITY

Drain after use, filtration system for continued use

FEATURES

Hydrotherapy jets, Buoyancy jets, Ozonation, Chromotherapy lights, heating system

ADD ONS

Computer control panel, thermally insulated cover, outer panel lights, plastic skirting, wooden panelling

SPA WHIRLPOOL SYSTEM

The science behind water based wellness...

Heat

When your muscles strain, lactic acid is produced. Heat speeds up lactic acid removal, allowing faster muscle recovery and lower fatigued. Moving hot water increases heat conduction.

Massage

Massage is the manipulation of superficial and deeper layers of muscle and connective tissue to aid healing, and promote relaxation and well-being.

Buoyancy

Buoyancy is an upward force exerted that opposes the weight of an immersed object. When submerged, there is less pressure on the body, tissues, and muscles and therefore complete rejuvenation

Specifications

- 24 Body Jets
- 20 Bubble Jets
- 2 underwater light
- 4 Jacuzzi Pump 1.5 hp
- 1 Blower
- Grating 8 inch
- On line Heater
- On line Filter
- P.U coating

Features

- Online heating system
- Illumination system
- Massage jet system
- Circulating filtration system
- Online filtration system

Additional Features

- Side and front panels
- Thermally insulated cover

SPA WHIRLPOOL SYSTEM

The technology behind water based wellness...

Heat >> Online heater or Air source heat pump

Depending on volume of water, we suggest the power rating and type of heating technologies to be employed for a whirlpool system.

Massage >> Positioning & number of whirlpool nozzles

Based on the shape, design and seating plan of the whirlpool, we suggest the number of whirlpool nozzles.

Buoyancy >> Positioning & rating of air jet blower

Positioning of air jets is essential for consistent effervescence in the whirlpool. As per the design of the tub, the appropriated air blower kit is installed.

- 1 sand filter
- 3 air blower
- 5 heat pump
- 7 underwater lights

- 2 whirlpool pump
- 4 recirculation pump
- 6 whirlpool nozzles
- 8 feather touch control panel
